3/4D EDUCATION

Preliminary Notice

The 3-day educational program includes a series of lectures demonstrating over 400 video clips of cardiac anomalies and live demonstration of the normal and abnormal heart examination. The program will cover all aspects of 3D/4D ultrasound imaging by providing a mix of technical and clinical presentations, live scanning sessions and hands-on workshops. Particular focus is on clinical applications of volume imaging and other 3D/4D technologies specifically related to Obstetrics and Gynaecology.

Melbourne Convention Centre
Victoria, Australia
